

*Ljustr. A. B. Lagrelius & Westphal.*

VIEW FROM THE SAME POINT AS IN PL. 38, BUT LOOKING S. 29° W. ACROSS THE SEJT-KÖL.

In the Background is the «Bolta» between the Northern and Southern Basins of the Lake. On the Left, i. e. the Eastern Shore of the Lake, the Photograph shows how the Steep Lee-sides of the Dune-masses are situated, whereas on the West Shore the Dunes have a Gentle Slope up to the Next Accumulation, shown in Contour in the Upper Part of the Photograph on the Right.
