

- Tashkend, pulse of, 306; rice in, 372; wine in, 221.
- Tavernier, 241, 242, 406, 477, 478.
- Tea, 553-554.—The request of an envoy from Arabia for tea-leaves (p. 554) meets its counterpart in a similar document recently translated by Sir E. D. Ross (*New China Review*, Vol. I, p. 40), who observes, "It is curious to note from these memorials that tea, which was first brought to Europe toward the end of the sixteenth century, appears to have been in demand in Arabia long before that period." The ancient Chinese form of the word for "tea" was *da, which, like all initial dental sonants, could pass into the palatal series (hence mediæval Chinese *dža and dialect of Wu *dzo*), or could be changed into the dental surd (hence dialect of Fu-kien *ta*, the source of our word "tea"; Korean *ta*, Annamese *tra*).
- Tenasserim, Memecylon of, 315; wine of, 286.
