

Bottom of casket (or) orn. with a pair of lines round edge and another pair $1\frac{1}{4}$ " within, the lines of each pair being about $\frac{1}{4}$ " apart. At each corner was a hemispherical bronze boss with projecting flange at base, of which one boss is in position, one disconnected (L.M. i. ii. 07), and two missing. They appear to have been attached with lac only. Round base of each boss is red line, and in border, R. and L. of each, is small painted crescent. Field shows no orn.

Sides (03 and 04) are narrow panels with end edges cut to angles of about 40° with longest edges. On 03 are traces of painted grotesque animals and clouds of type similar to those on top, within border of double lines.

All pieces much faded and damaged. Most of red lacquer of pattern has disappeared, but the forms are visible on account of the better preservation of the portions of black ground originally covered by the red pattern. Size of top, $1' 11" \times 6\frac{7}{8}"$; bottom $1' 5\frac{3}{8}" \times 5\frac{1}{4}"$; sides, long edge $1' 11"$, short $1' 5\frac{3}{8}"$, end edges $4\frac{1}{2}"$, width $3\frac{1}{2}"$. Thickness throughout $\frac{1}{4}"$. Bosses, h. $\frac{5}{8}"$, diam. $1\frac{1}{4}"$. Pl. XXV.
