

PRELIMINARY MAP  
OF  
**EASTERN TURKESTAN**  
TO ILLUSTRATE THE REPORTS ON  
SIR DOUGLAS FORSYTH'S MISSION TO KASHGAR,  
1873-74.

Compiled by CAPTAIN H. TROTTER, R.E. DEPUTY SUPERINTENDENT GREAT TRIGONOMETRICAL SURVEY OF INDIA. Drawn and photolithographed in the Office of COLONEL J. T. WALKER R.E. F.R.S. &c. SUPERINTENDENT of the Survey. January 1875.

NOTE.

The positions of all places visited by the Mission in E. Turkestan and Wakhan depend upon Captain Trotter's astronomically fixed position of KASHGAR (Kashghar) viz. N. Lat. 37° 14' 50" and Longitude 75° 0' 4" E. of Greenwich.

The positions of the Burkhah (or River of Karakoram) and in the Akai are taken from Pechenka's map accompanying his Memoir on the Head Waters of the Oxus. Details in Russian Territory are from the Russian topographical map of CENTRAL ASIA (corrected to 1873) as also are the positions of Akai and the large towns to the E. with the exception of those in the extreme N.E. portion of the map which are taken from Her Kiaz's map of WESTERN MONGOLIA published in the Royal Geographical Society's Journal for 1873.

The details in the S. are taken from surveys and reconnaissances by members of the mission and from Colonel Walker's map of TURKESTAN. The positions in the latter have been shifted three minutes to the west in longitude to bring them into accordance with the most recently determined values of the Madras Observatory.

Where no Survey exists numerous details have been inserted from native information.

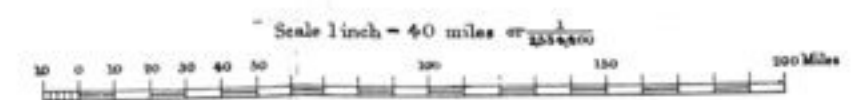

The heights are mostly based on the G. T. Survey values of Lev. Sta. No. 2. viz. 11,518 feet above sea level.

Routes followed by members of the mission are coloured red.

*The Boundaries laid down on this Map are approximate only and are not to be considered authoritative.*

*Douglas Forsyth*

*Longest range, pass about 17,000 ft. Lat 26° 7' - Khashgar. Tally on 2317. Large karst of 2000 ft. high. 1904. 7. 248*

*with Capt Trotter's Compliments*
