

is decorated with seven transverse zig-zag bands which are formed through small, very pointed, incised triangles. L. 15.3 cm. Fig. 14:7.

5.L:3. Wooden pin of same kind as —:2 but with thicker head, having eleven groups of triangle-bands. The pointed end broken off. Found sticking in the woollen fabric —:6. L. 17.3 cm.

5.L:4. Wooden object consisting of two halves, of the same kind as 5.D:9 etc. When found the now decayed red wool was neatly wound round a layer of feathers in the sunken part of the two halves. One end straight, the other blunt-ended. The interior deeply hollowed out; it contained a few bones from the head of a large lizard. The two halves are of uneven length: 11.5 and 10.5 cm. Diam. 2.6 cm. Pl. 8:6.

5.L:5. One half of an object identical with —:4. The hollowed part is painted red. 9×2.7 cm. Pl. 8:1.

5.L:6. Two fragm. of an undyed, pale yellowish-white woollen mantle in rep weave. The warp twisted somewhat harder than the weft. Selvage preserved at one part, strengthened by a thick cord.

5.L:7. Small bundle of reddish-brown wool, wound round in two places with the same kind of thread, in one of which a small feather is inserted.

Finds mainly from the surface of Cemetery 5.

(5:1—5:44 from the flat eastern end of the hill.)

5:1—2. Two willow-leaf-shaped arrow-heads of light-green silex and brown chert. Rather blunt-ended, of inferior make. —:2 is slightly polished. L. 39 and 41 mm. Pl. 12:4—5.

5:3. About half of a leaf-shaped arrow-head of green silex. Pl. 12:6.

5:4. Leaf-shaped arrow-head? of polished slate. L. 42 mm. Br. 12 mm. Pl. 12:3.

5:5. Whetstone of slate, one edge has some transverse lines. 97×25 mm.

5:6. Flat bead of green, flamy serpentine. Diam. 9 mm. Pl. 15:8.

5:7—15. Nine barrel-shaped beads of striated, grey and white opal. L. 12—8 mm. Pl. 15:16.

5:16. Eight small beads of shell (a *Spondylus*) attached to the original cord.

5:17. Ninety-six small shell beads, mostly with the original string remaining in the holes.

5:18. Three thin, flat beads of shell. Diam. 6 mm. Pl. 15:9.

5:19. One hundred and twenty-four small beads of shell of same kind as —:21.

5:20. One hundred and fifty-five small beads of shell of same kind as —:21.

5:21. Ninety-three small beads of shell. Diam. 5—2 mm. Pl. 15:15.

5:22. Small flat, oblong object, slightly curved, of light-green dental bone (?). The convex surface has ten transverse lines 25×6 mm. Pl. 15:7.

5:23. Fragm. of corroded, somewhat concave bronze ring-fitting.

5:24—25. Two small bronze fragm., possibly of two-winged arrow-points.

5:26. A few corroded bronze fragm.

5:27. Wooden cup, made in one piece. Near the edge there are two pairs of holes 7 cm. from each other. H. 11 cm. Diam. 13.5—12.5 cm. Pl. 12:15.

5:28. Rectangular wooden object, handle? One side convex, the other concave, at each end a moulding. 79×18 mm. Pl. 9:7.

5:29. Small wooden object of nearly the same shape as —:28. 51×14 mm.

5:30. Fragm. of round wooden peg with four globular mouldings and two transverse rows of small triangles filled with red. Pl. 9:8.

5:31—39. Nine fragm. of arrow-shafts or pegs of wood, decorated with transverse or longitudinal rows of small triangles filled with red.

5:40. Two-winged arrow-point of bone with large barbs and a socket to receive the shaft. On each side six incised lines, V-shaped. 88×18 mm. Pl. 12:9.

5:41. Small bone object of unknown use. A straight piece with an oblique projection. Decorated with four groups of transverse lines. A groove follows one edge of the projection and continues along the shorter part of straight member. L. 73 mm. Pl. 12:11.

5:42. Bone object of same type as —:41 but with broken points. Pl. 12:10.

5:43. Fragm. of bone lamella with one flat and one convex surface, the latter
