

CHAPTER XV. OASES.— <i>Continued.</i>	
The oasis as a geological problem.— <i>Continued.</i>	301-303
Physiographic classification of oases.....	301
I. Delta oases.....	301
(a) Of rivers.....	301
(b) Of small streams.....	302
II. River-bank and flood-plain oases.....	302
III. High-valley oases.....	302
IV. Spring and well oases.....	302-303
V. Lake-shore oases.....	303-307
Relations between erosion and burial in the obliteration of kurgans (oasis culture deposits)	307-310
The ancient Alai Valley route from Bactra to Kashgar.....	307
Objective criteria of ancient long-used routes.....	307-308
The three controlling factors of trade routes.....	308-310
Advantages of the Alai Valley route.....	310-316
Oases of the Zerafshan.....	310-311
River-bank (type II) oases of the lower Zerafshan.....	311
Afrosiab.....	311-316
High-valley (type III) oases of the upper Zerafshan.....	316-317
Hissar.....	317-320
Abandoned oases of Fergana.....	317-318
Kara Tepe (Western).....	318
Eeman Tepe.....	318-320
River-cut mounds of Millitinskaya.....	320-330
Anau.....	320
Peculiarities of Anau as an oasis of type <i>Ib</i>	321
The building of a tilting delta.....	322
Erosion cycles of the Anau Su in the mountains.....	322-324
Recent decrease of surface drainage.....	324-327
Shape of the Anau Delta and its surface irregularities wrought by man's debris of occupation and his control of alluvial depositions.....	324-327
The ancient and the modern dunes of Kara Kum and the interbedding of the delta margins with them.....	327-328
Analysis of shaft sections of the deposits from man, water, and wind.....	328-330
Physiographic reconstruction of the past in Anau.....	330
Oases of the Murg-ab Delta.....	330-337
The river Murg-ab and the type peculiarities of the Merv oases, past and present.....	330-333
Irregularities of the delta surface wrought by man's debris of occupation and his control of alluvial depositions.....	333
The great mound of Odontche Tepe.....	334
Analysis of shafts at Ghiaur Kala. The deposits from man, water, and wind.....	334-336
The stratigraphic order [(1) loess, (2) dune-sand, (3) alluvium] explained by climatic change to dry and recession of the delta.....	336-337
PART VI. ANIMAL REMAINS FROM THE EXCAVATIONS AT ANAU, AND THE HORSE OF ANAU IN ITS RELATION TO THE RACES OF DOMESTIC HORSES. J. ULRICH DUERST.	
CHAPTER XVI. INTRODUCTION AND DESCRIPTION OF MATERIAL.....	341-343
CHAPTER XVII.....	345-354
Carnivora.....	345-354
Foxes of Anau I and II.....	345-346
Wolf of Anau I anatomically compared.....	346-347
Domestic Dog of Anau II anatomically compared with prehistoric and recent domestic and wild dogs.....	348-354
Probably imported into Anau.....	350
Rodentia.....	354
Remains of mouse.....	354
