GEOGRAPHICAL COORDINATES:

The latitudes are north, except where S, south, is added. The longitudes are East of Greenwich. When determined by the G. T. Survey of India they are marked by S, our own determinations by F; for stations not distinguished by a sign they are most carefully taken from the best existing maps. All the longitudes are referred to the Madras observatory, for which the value is adopted: 80° 17' 56" E. Gr.

REMARKS: Since the first publication of the "Mean Temperatures," which appeared 1862 in the Phil. Transactions of the Royal Society of London, and in the Annuaire de Berlin and Munich, and in Tables printed for the "Medical Inspectors General" of Calcutta and Madras, I could add the following materials in the present edition:
