Thermic character of the Seasons.  
Variation with Latitude.

## The Cool Season.—Decrease with Height.

Rapid decrease with increasing altitude.

It is general less rapid than in the mean of the year.

## The Hot Season.

It considerably varies with the position in the Indian peninsula.

Generally it is too rapid in Central India; it is too slow.

## The Rainy Season.

It is everywhere remarkably rapid.

## The Autumn.

It shows but small variations from the annual mean and does not correspond, in this regard, to the slow variation of temperature with latitude.
